Sup'R Safe : Good data, well guarded

Release	18.04.2020	Version	3018203116b
Product	Mastok 3000		
Type	RAID Disk Arrangement	Level	Standard RAID 5
Layout	<ul style="list-style-type: none">◦ First parity on disk N◦ Inverted / Left rotation◦ Left-to-right data placement	Chunk Size	<i>Default 1 byte</i>
Description Mastok 3000 is a Left-Asynchronous redundant array with 1 parity drive. It can manage from 3 up to 12 disks simultaneously, using cutting edge technologies such as Ubuntu Linux or Python 3.8. Take the control of your data and be prepared to restore up to 1 disk thanks to it's highly redundant virtual disk scheme. We are running Arch, btw <div>(+33) 04.22.52.10.10</div>
